

Stephen Hinshaw, Ph.D., is Professor of Psychology and Chair of the Department of Psychology at the University of California, Berkeley. He received his A.B. from Harvard in 1974, graduating summa cum laude. He received his Ph.D. in Clinical Psychology from UCLA in 1983. He was a clinical psychology intern at UCLA's Neuropsychiatric Institute from 1981-82 and a post-doctoral fellow at the Langley Porter Psychiatric Institute of UC San Francisco, from 1983-85. Dr. Hinshaw taught in the Psychology Department at UCLA from 1986-1990 and joined the Berkeley faculty in 1990. In 2001, he was the recipient of the Distinguished Teaching Award from the College of Letters and Sciences at Berkeley. Dr. Hinshaw's research focuses on developmental psychopathology, with particular emphasis on peer and family relationships in children with externalizing disorders, neuropsychological risk factors for psychopathology, comparisons and combinations of pharmacologic and psychological interventions for children with ADHD--and mediators and moderators of treatment outcome, assessment and evaluation, conceptual and definitional issues in the field, and stigma and mental disorder. Dr. Hinshaw has directed summer research camps for boys and, more recently, for girls with ADHD and associated disorders for 15 years. Dr. Hinshaw has authored over 150 articles, chapters, and reviews on child psychopathology; his book, *Attention Deficits and Hyperactivity in Children*, was published by Sage Publications in 1994. He is Associate Editor of the journal *Development and Psychopathology*, and he is on the editorial board of five other journals in the field. Dr. Hinshaw is Past President of the International Society for Research in Child and Adolescent Psychopathology and of Division 53 of the American Psychological Association (Society for Clinical Child and Adolescent Psychology). He is a fellow of the American Psychological Association and the American Psychological Society. In 2002, he published *The Years of Silence are Past: My Father's Life with Bipolar Disorder* which furthered his interest in narrative accounts of mental disorder. His most recent books are on the subjects of stigma and mental illness, girls with attention-deficit/hyperactivity disorder, and personal and family accounts of mental disorder.
